

Arizona Spay & Neuter Clinic
6835 E Thomas Rd
Scottsdale, AZ 85251
480-874-3647
Monday – Friday 8am – 6pm

Your pet has undergone major surgery and anesthesia and their behavior may be altered tonight and into tomorrow morning. For example, your pet may be wobbly, sleepy, irritable, and may have glossy eyes. Listed below are some suggestions and instructions to aid in a pleasant recovery.

1. Tonight give ½ the normal amount of food after 6 pm. Your pet may feel nauseous, do not be concerned if your pet is not interested in the food until tomorrow. Occasional vomiting after surgery can be normal. If your pet is nauseous please do not offer food or water until the following morning. Call us for instructions if your pet is not eating within 24 hours of surgery.
2. **DO NOT ALLOW** your pet to run around the backyard, try to keep them on a leash outside when going potty after surgery for at least 5 days. If needed call us for sedatives.
3. **DO NOT ALLOW** your pet to lick, chew, or scratch at the incision site. If your pet is bothering the incision you need to obtain pain meds and an e-collar immediately. We have e-collars available for \$14.00. If your pet licks or chews at the incision it can cause infection and cause the incision to open. This may occur at any time during the first 7 days after surgery.
4. No swimming or bathing for 14 days after surgery. You may use a moist towel to clean them if necessary.
5. Expect swelling at the incision site, this is a normal reaction to absorbable sutures. A mild amount of bleeding and discharge from the incision is normal, call us if you think this discharge is excessive.
6. Pain medications are available through our office. **DO NOT GIVE TYLENOL OR ASPIRIN, as these can be toxic.** Please call if your pet is in pain or licking the incision.
7. We use absorbable sutures so there is no need to have sutures removed. We will inform you if there is a need for a follow up visit. Recheck exams are included in the price of the surgery, do not hesitate to recheck with us if you are concerned about your pet's recovery status.
8. We use surgical skin adhesive that may cause the incision to have a blue or green color, do not be concerned.

We perform thousands of surgeries every year, and complications are very rare; however, if you have **ANY QUESTIONS** or concerns give us a call so that we may assist in the care of your pet. For after hours questions call our office, this number is forwarded to our office manager **Treva** and she will be happy to help you with any concerns **(480) 874-3647**. If Treva is unavailable you may contact **Dr. Mel Pence** our responsible veterinarian at **(480) 318-9156**.

For emergencies you may contact The Scottsdale Veterinary Clinic at (480) 945-8484 (7am-7pm, 7 days a week) or The Emergency Animal Clinic at 480-949-9001 (24 hours). You will be responsible for any charges incurred at these facilities.
